# FALCON

SATELLITE TV

Falcon was founded in 2010, for the purpose of launching portable satellite TV as its main product onto the market.

In 2011, Falcom developed an all-in-one satellite TV and its security device for the first time in Korea.

In 2015, it also developed a DIY smart TV with GNSS, which can be used outdoors.

Falcom is a global venture company, challenging the market in camping, leisure, and disaster broadcasting area.

Camping

Tailgate parties

Leisure

# Anywhere SMART TV Outdoor

Anywhere Smart TV is an all-in-one touch-screen TV for next generation, which can be used anywhere in the world, supporting 70 languages.

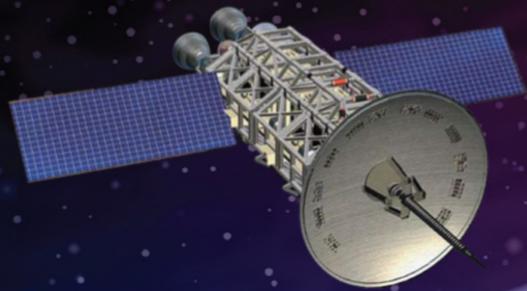

Its automatic satellite positioner enables its user to receive 170 free-to-air satellite broadcastings worldwide. It can also access free terrestrial broadcastings and internet, then thus provide additional functions, such as reception of IPTV and capabilities of Youtube video playing, wi-fi miracast, hotspot access, and KOD with PVR.

It is a DIY product for ordinary users and can be easily installed at home without any professional help.

# Auto Tracking Satellite Antenna

It is a hypersensitive flat antenna for outdoor activities, which is able to track satellite automatically by scanning target and is assembled with LNB converter. It is designed to consume low energy, so suitable to be used outside.

Motorized Satellite Antenna

# Combo Smart Set/Top Box

It is a smart set-top box product with a detachable monitor, which is able to receive IPTV by accessing satellite broadcastings, terrestrial broadcastings and networks. With HDMI output function, it supports HD quality video playback regardless of screen size.
